SKILLS

Automation & Testing

Playwright · Cypress · Selenium WebDriver · Shift-left Testing · Postman · Bruno Collection · API Testing · Performance Testing (JMeter) · BDD / Cucumber

Programming

TypeScript · JavaScript · Java

Tools & Process

Jira · X-Ray · Zephyr · TestRail · Agile / Scrum / Kanban · GitHub Actions · GitLab CI · Jenkins · GitHub Copilot

LANGUAGES

Spanish — Native

English — Advanced / Professional

EDUCATION

System Engineer (2011)
Technological University of Pereira

ABOUT ME

Senior SDET with 10+ years designing and maintaining automation frameworks from scratch for banking, media, AdTech, and retail. Currently at Globant working with Santander UK, where I reduced regression execution time by ~95%, reached 80% E2E coverage, and scaled performance testing from 0 to 3 suites. Deep expertise in Playwright + TypeScript. I work where quality and speed have to coexist — and I use AI tools daily to move faster without cutting corners.

WORK EXPERIENCE

Globant · Santander UK

TEST AUTOMATION ENGINEER — May 2025 – Present

- Designed and maintained Playwright-based E2E and API automation framework from scratch. Reduced regression execution time by ~95%
- Updated +60 obsolete manual tests to automated coverage, reaching 80% E2E coverage across core user journeys
- Scaled performance testing from 0 to 3 suites using JMeter, Postman and Bruno Collections
- AI-assisted daily workflow using GitHub Copilot for test generation, refactoring and documentation
- Worked closely with UK-based teams in Agile/Scrum environments

BairesDev

TEST AUTOMATION ENGINEER — REMOTE — Oct 2022 – May 2025

Project: Kinesso — Nov 2024 – May 2025

- Developed and executed automated test suites using Playwright for web applications
- Designed and executed API test scenarios using Postman
- Managed test cases and defect tracking using Jira and Zephyr
- Delivered in a fully remote, international environment ensuring high-quality releases

Project: Windifferent — Oct 2022 – Sep 2024

- Designed and executed API automation tests using Postman and Cypress
- Implemented automated regression suites with Cypress
- Managed test cases and defect tracking using TestRail and Jira
- Ensured quality standards across multiple releases in an Agile environment

Xcede

TEST AUTOMATION ENGINEER — REMOTE — Sep 2023 – Sep 2024

- Led the refactoring and optimization of an existing Playwright automation framework
- Implemented automated testing for both UI and APIs, improving maintainability and execution stability
- Managed defect tracking and reporting using Jira

Magentrix

QA AUTOMATION — REMOTE — May 2021 – Oct 2022

- Automated end-to-end and API tests using Cypress and Playwright
- Designed and maintained automated test cases ensuring consistent regression coverage
- Managed test plans and execution using TestRail
- Collaborated with cross-functional teams to integrate quality early in the development lifecycle

GAP

QA AUTOMATION — REMOTE

Jan 2022 – Oct 2022

Abrigo Project

- → Developed automated UI and API tests using Cypress and Postman
- → Designed BDD test scenarios using Cucumber
- → Managed defects using Jira, ensuring clear communication with development teams

DELL – MSDF Project

- → Executed automated testing using Cypress
- → Designed and executed test cases using Cucumber
- → Managed defects and test execution using Jira and Zephyr

Globant · Turner – CNN

SENIOR QC ANALYST

Sep 2017 – May 2021

- → QA Lead for CNN's U.S. Elections project — high-visibility, high-stakes international platform
- → Worked partially onsite at CNN Atlanta, coordinating testing activities with US-based teams
- → Designed and executed manual and automated test cases using Cypress
- → Managed defects and test cycles using Jira and X-Ray
- → Created quality metrics, reports and testing procedures aligned with enterprise standards

UNO+UNO

BUSINESS PROCESS & SUPPORT ENGINEER

Jun 2015 – Sep 2017

INDRA SISTEMAS

SOFTWARE ENGINEER — GRADE II

Aug 2013 – May 2015
